

3-5-2015

Dear Valued Customers

Subject: Horizon Floors Hardwood Compliance Statement

We take pride in designing and manufacturing fashion forward eco-friendly flooring solutions to serve the needs of homeowners and builders throughout North America. We stand on our reputation of manufacturing distinctive flooring in state-of-the-art facilities. Our commitment to minimizing our carbon footprint is reflected in our everyday decisions and business practices.

In light of the recent 60 Minutes Lumber Liquidators broadcast regarding falsified indoor air quality data on laminate flooring products imported from China, we would like to take this opportunity to appreciate the trust you have placed in us to provide only the highest quality products. We regard the health and well-being of our customers very seriously.

Our Hardwood product specifications adhere to all environmental, health and safety requirements including formaldehyde emissions of the U.S. federal government and where applicable, state regulations such as the California Air Resources Board (CARB II). Additionally, we are compliant with LACEY Act and ISO 9001:2000 for quality assurance and 14001 for environmental management.

As part of our commitment to product quality and safety, we will continue to conduct random testing to ensure the compliance of our products with independent certified labs at Hardwood Products Veneer Association (HPVA) and SGS. All HWPW suppliers to Horizon Floors are certified by a Third Party Certifier approved by California Air Resources Board to ensure compliance with CARB Phase II. Please refer to the enclosed certifications for your reference.

We are dedicated to providing the best quality and safest products to our customers every day. We hope this information is helpful for you and should you have any questions please feel free to contact us.

Sincerely,

A handwritten signature in black ink, appearing to read "Alex Shaoulpour".
